

Ticket to Ride Builder

Dominic Chui and Kaizen Conroy

Project Overview

- An app to custom build Ticket to Ride Maps
- Ability to upload custom pictures as background

Architecture

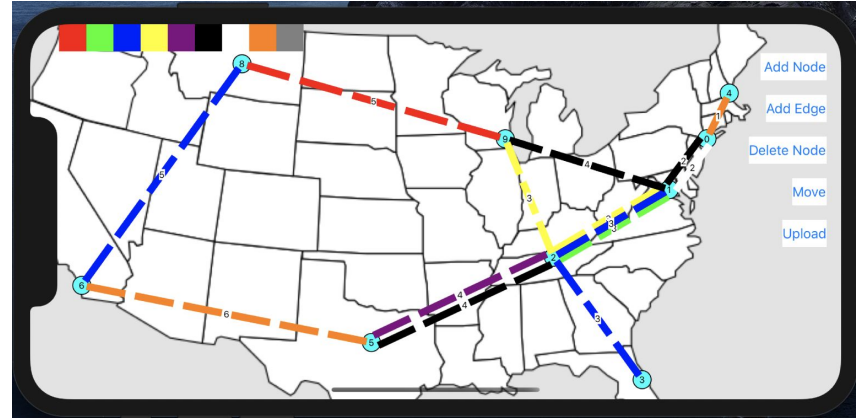

Model-View-Controller Paradigm

- Model uses a drawable graph, a composition using the GraphADT
- View is a graph view

UI

Build modes from buttons

- Add node
- Add edge
 - Different colors to select
 - Up to 3 edges between 2 nodes
- Delete node
- Move node
- Upload photo

Status

Complete

- User can add nodes and edges, move and delete nodes, and upload images
- View can be zoomed and panned

Incomplete

- Save/load
- Allow user to name nodes
- Multiple views

Wishlist

- Gameplay
